San Diego, CA 92101

### COMMENTS ON DRAFT 2004 ANNUAL GROUNDWATER MONITORING REPORT, FORMER MARINE CORPS AIR STATION, TUSTIN

Dear Mr. Dunaway:

We have completed our review of the above-referenced document, dated May 2005, which we received on May 20, 2005. This document discusses the results of the groundwater monitoring and sampling program, which took place at sites IRP 3, IRP 6, IRP 12 and the Mingled Plume Area in the year 2004. We have the following comments:

- IRP-6  
The concentrations of 1,1 dichloroethene are increasing in the downgradient monitoring well I006MW03S. We request the development and submittal of a work plan for additional groundwater monitoring wells to determine the downgradient extent of the plume.

#### Suggestion regarding the tables

Instead of using the seasons to identify the different time periods in which samples were collected, please indicate the month the samples were collected.

If you should have any questions, please call me at (951) 782-4498, or send e-mail to [phannon@waterboards.ca.gov](mailto:phannon@waterboards.ca.gov).

Sincerely,
